THE CHALLENGE

Too many organizations spend too much time manually overseeing the individual network components of their IT infrastructure. The consequence? Processes that are more time-consuming, less efficient and that introduce more security risk and margin for error.

OUR APPROACH

At Force 3, we strive to help clients achieve the best possible outcomes from their network infrastructure solutions through strategies that blend efficiency, flexibility, value and innovation. Critical to that approach? Automation and orchestration—not to mention a constant focus on security.
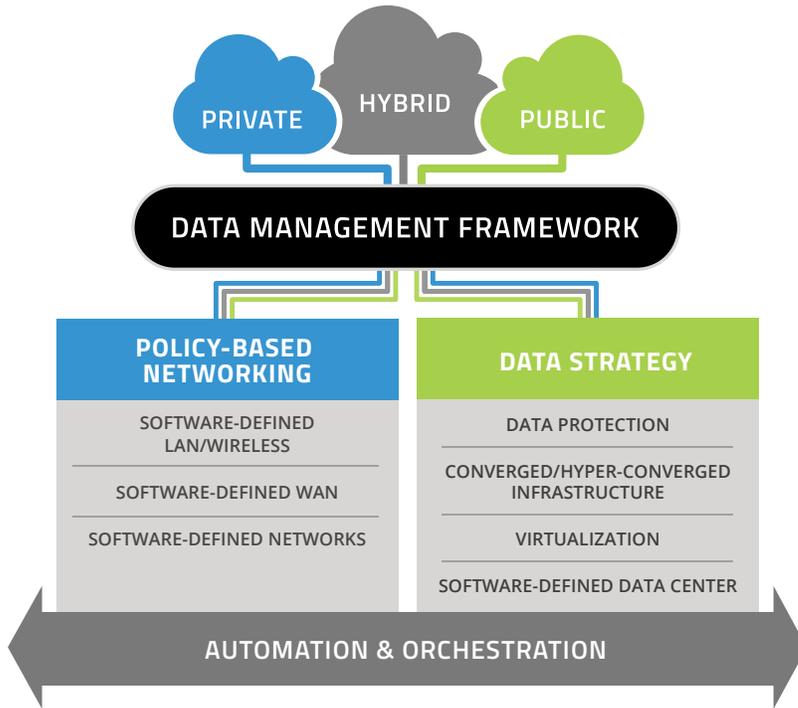

SECURITY FIRST

As *the* Network Security Company, Force 3 is committed to providing the most secure solutions possible and to protecting your organization's most important asset: your data. When you choose Force 3, you can trust that your technology investments are backed by a comprehensive array of best practices and a security-first mindset that permeates every project we undertake.

ABOUT FORCE 3

Force 3 is the Network Security Company. We provide secure IT solutions and services for clients who demand value and reliability. Together with our parent company, Sirius Computer Solutions, we offer a wide range of solutions and services backed by expert engineers and strategic partnerships.

From design to deployment, support and maintenance, we constantly focus on supporting our customers' missions and promoting the best possible outcomes. Your success is critical to us—and we don't succeed unless you do.

FORCE3
A **SIRIUS** COMPANY

PRIVATE   HYBRID   PUBLIC

DATA MANAGEMENT FRAMEWORK

POLICY-BASED NETWORKING	DATA STRATEGY
SOFTWARE-DEFINED LAN/WIRELESS	DATA PROTECTION
SOFTWARE-DEFINED WAN	CONVERGED/HYPER-CONVERGED INFRASTRUCTURE
SOFTWARE-DEFINED NETWORKS	VIRTUALIZATION
	SOFTWARE-DEFINED DATA CENTER

AUTOMATION & ORCHESTRATION

INFRASTRUCTURE SOLUTIONS FROM FORCE 3

Spanning public, private and hybrid cloud environments, infrastructure solutions from Force 3 are divided into two primary areas: policy-based networking and data strategy solutions.

Policy-Based Networking:

Create a centralized management system. Develop and enforce consistent policies across your network. Enable end-to-end automation and cross-platform orchestration.

- Software-Defined LAN/Wireless
- Software-Defined WAN
- Software-Defined Networks

Data Strategy:

Safeguard your data with a solid back-up strategy. Develop a comprehensive approach to data security and accessibility. Create a disaster recovery plan that enables continuity for your agency. Automate your infrastructure to meet data requirements.

- Data Protection
- Converged Infrastructure
- Hyper-Converged Infrastructure
- Virtualization
- Software-Defined Data Center

AUTOMATION & ORCHESTRATION

From policy-based networking to data management strategies, automation and orchestration offer a wealth of benefits for organizations looking to simplify their IT infrastructure—including how it's managed.

Automation provides a unified platform for translating design criteria into network configurations. Similarly, orchestration allows IT teams to automate behaviors and processes across multiple platforms to coordinate networking hardware and software to support any necessary applications and services. As a result, organizations can:

- Limit redundant tasks
- Decrease time expenditure
- Reduce margin for error
- Strengthen your security posture
- Allow more time for strategy and innovation
