

From inter-agency information sharing to modernization and telecommuting demands, today's federal agencies face a host of far-reaching communication and collaboration challenges. Left unaddressed, these problems could jeopardize not only individual projects but personal safety—not to mention the agency's overall mission. Fortunately, there's never been a better time to adapt and evolve.

THE CHALLENGE

Today's federal agencies face numerous compliance demands, including modernization requirements, along with telework, security and cloud regulations. Meanwhile, with many agencies based in sprawling campuses and employees located across the globe, the need for seamless communication is particularly critical.

Too often, unfortunately, agencies rely on legacy systems and disparate collaboration tools that can lead to **delayed decision making, unforeseen costs, disjointed teams, loss of productivity, inefficient use of space, increased security risks and more.**

Between shrinking budgets, a constant stream of cyber threats, never-ending security audits and personnel constraints—achieving secure, anywhere, anytime collaboration is more complex than ever.

OUR APPROACH

Modern organizations realize that the key to a more productive, collaborative, secure workforce is a unified, interoperable collaboration ecosystem. Whether it's a project requiring participation from people spread thousands of miles apart, a warfighter in a combat zone or a person experiencing a medical emergency on a massive campus, the right collaboration experience can be the difference between mission success and institutional failure. Force 3's approach to collaboration means:

- **Reliable network access anytime, anywhere, from any device, with end-to-end security**
- **Solutions designed to enable seamless collaboration for every department and every user**
- **Assurance that your people can communicate when it matters most**

OUR OFFERINGS

Force 3 helps clients navigate the complexity of today's collaboration landscape to develop a comprehensive strategy complete with modern technologies designed to support your mission. With the right collaboration tools, you can transform how your people and teams interact and work together. The result? An organization and employees who are empowered to succeed.
